

QUALITY POLICY

The management board of **Condensadores Industriales S.L.** makes available through this document his quality policy for its knowledge and following by all his employees as for the knowledge of our clients, suppliers and all interested parties . This policy is based on the following points:

- a) We seek to be a leading company in the scope of:
 - Design, production and commercialization of capacitor banks and automatic systems for the correction of the power factor in low voltage.
 - Commercialization of spare parts for said systems.
- b) With our technology we get ahead of our clients' needs with the objective of fulfilling them.
- c) In the scope of satisfying our clients we will include both the quality of our products and the one of our services.
- d) In reference to our activity and our products we will always respect current applicable norms and laws.
- e) To achieve our desired quality standards we will grant our employers the required formations to be at the level of new technologies as an adequate workstation and work environment.
- f) We will base and direct our quality policies to a system of constant improvement, based on the knowledge of the indicators of the key processes of our company.
